Please carefully read the Wii™ operations manual completely before using your Wii hardware system, game disc or accessory. This manual contains important health and safety information.

Important safety information: read the following warnings before you or your child play video games.

⚠️ WARNING - Seizures

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, and this may occur while they are watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.
- Parents should watch their children play video games. Stop playing and consult a doctor if you or your child has any of the following symptoms:
  - Convulsions
  - Eye muscle twitching
  - Altered vision
  - Loss of awareness
  - Involuntary movements
  - Disorientation
- To reduce the likelihood of a seizure when playing video games:
  1. Sit or stand as far from the screen as possible.
  2. Play video games on the smallest available television screen.
  3. Do not play if you are tired or need sleep.
  4. Play in a well-lit room.
  5. Take a 10 to 15 minute break every hour.

⚠️ WARNING - Repetitive Motion Injuries and Eyestrain

Playing video games can make your muscles, joints, skin or eyes hurt. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. Parents should monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don’t think you need it.
- If your hands, wrists, arms or eyes become tired or sore while playing, or if you feel symptoms such as tingling, numbness, burning or stiffness, stop and rest for several hours before playing again.
- If you continue to have any of the above symptoms or other discomfort during or after play, stop playing and see a doctor.

⚠️ CAUTION - Motion Sickness

Playing video games can cause motion sickness in some players. If you or your child feel dizzy or nauseous when playing video games, stop playing and rest. Do not drive or engage in other demanding activity until you feel better.

Caution: Wrist strap use

Also remember the following:
- Make sure all players put on the wrist strap properly when it is their turn.
- Do not let go of the Wii Remote during game play.
- Dry your hands if they become moist.
- Allow adequate room around you during game play and make sure that all areas you might move into are clear of other people and objects.
- Stay at least three feet from the television.
- Use the Wii Remote Jacket.

System menu update

Please note that when first loading the Game Disc into the Wii console, the Wii will check if you have the latest system menu, and if necessary a Wii system update screen will appear. Press OK to proceed.

When the system menu is updated, unauthorized hardware and/or software modifications may be detected and unauthorized content may be removed causing the immediate or delayed inoperability of your console.

Failure to accept the update may render this game, and future games, unplayable. Please note that Nintendo cannot guarantee that unauthorized software or accessories will continue to function with the Wii console after this or future updates of the Wii system menu.

**MAIN MENU**
Choose between Campaign, Multiplayer, and Zombies.

**CAMPAIGN**
Start a brand new Call of Duty®: Black Ops Single-Player Campaign or resume a previously saved game*. Use the Mission Select option to replay completed missions on any Difficulty. Use the Intel option to view informative documents acquired via collectibles hidden throughout the Campaign. Use the Profile option to create, change or delete player profiles. Use the Controls option to adjust controller settings. Adjust gameplay and interface settings in the Options menu.

*Note: Call of Duty®: Black Ops uses an automatic checkpoint-based save system. Select the Save and Quit option from the in-game Pause Menu to save game progress and return to the Main Menu.

**MULTIPLAYER**
Compete against other Call of Duty®: Black Ops players to earn Experience Points (XP) and currency. Use XP and currency to unlock and purchase load-out items such as Weapons, Perks, and more for use in a variety of maps and game modes. Multiplayer game modes include:

- **Player Match**: Play online to earn currency to acquire new Weapons, Equipment, Perks, Killstreaks and more.

- **Private Match**: Create and host a private game with customizable game settings.

- **Wager Match**: Gamble earned currency against other players in a variety of game types.

- **Combat Training**: Play an assortment of game modes versus Practice Dummies alone or with friends.

**ZOMBIES (1 - 4 PLAYERS)**
Survive the Zombie hordes alone or cooperatively. Repel wave after wave of increasingly deadly Zombies in frightening locales. But be warned: there are more than just Zombies lurking these dark hallways...

**HEADS-UP DISPLAY (HUD)**

1. **Compass** – Shows the direction you are facing.

2. **Inventory** – Displays devices and/or weapon attachments that are currently available, such as the grenade launcher or motion sensor.

3. **Grenade Indicator** – Icon warning you that there is a grenade nearby, arrow indicates the location of the grenade.

4. **Damage Indicator** – Red marker shows that you are taking damage and the direction the damage is coming from.

5. **Use Icon** – This only appears when you are near a weapon or interactive object, indicates what button to press to interact with the weapon or object.

6. **Match Info (MP Only)** – Displays current score, team icon and time remaining in match.

7. **Ammo Count** – Shows remaining bullets for currently equipped weapon, as well as remaining Lethal and Tactical grenade supply.

8. **Mini-map** – Shows the local area plus locations of friendlies and known hostiles.

9. **Crosshair** – Indicates where you are currently pointing your weapon. Turns red when positioned over an enemy, green when positioned over a friendly. Walking or running causes the crosshair to grow wider or sometimes disappear altogether, indicating a loss of accuracy. Stopping movement, crouching, and going prone increase accuracy.*

*Note about ADS (Aiming Down Sight) - When you press the ADS button you will aim down the sights or scope of your weapon. This will greatly increase your accuracy and decrease your movement speed. While in ADS the crosshair will disappear.
HEALTH SYSTEM

When you take damage from an enemy, the screen will show blood splatter and the damage indicator will show you the direction the damage is coming from. As more damage is sustained the screen will grow redder, you will hear your heart rate increase, and your breathing will grow heavy. If you can find cover and avoid enemy fire you will slowly recover from the damage and be able to continue at full strength.
